ADDITIONAL INFORMATION

Projects

● **02/03/2023 – CURRENT**

Ronney-innovations Roney Innovations is a top-tier ecommerce company specializing in liquidating overstock and shelf pull merchandise. They partner with retailers directly, purchasing excess inventory for resale. Roney Innovations efficiently sorts, lists, and labels these items, preparing them for sale on various sales channels. They meticulously maintain and monitor their selling accounts to ensure a smooth selling process. Additionally, Roney Innovations optimizes their operations by selling off loads that do not meet their criteria

● **03/04/2022 – 01/08/2022**

Amz-amzascension Amz-amzascension monitor Amazon ads campaign of seller products. Amazon provides us multiple APIs to monitor our products Ads campaigns. In this project we sync all the data in database using **backend Jobs** and represent these information using graphical and manual form.

- Clicks on our product ad.
- CTR(click through rate).
- Ads CVR
- Total spend
- Total unit sale
- Total unit order
- Advance Filters + Searches + paginations

01/10/2021 – 02/04/2022

ECom-FBA This was an e-commerce project related to FBA (Fulfilment By Amazon). The purpose of this project was to keep track of our products listed on Amazon seller account. Amazon provides us multiple APIs to monitor our products. Ecom-fba covers the following tasks.

- Simplify the process of listing products on Amazon seller account by just uploading a manifest file.
- Change product price as needed.
- Can see products listed on Amazon seller account.
- Create a PO(purchase order) to buy products from vender and add it in warehouse storage.
- All other necessary functionalities like pagination, filters, searches and advance filter was provided in this project

01/07/2021 – 20/09/2021

Blue Ware house Discounts A mobile application working in USA main purpose of app is to list the product and user can reserve products and can get the products from their store or can pay online for fast picking or home delivery

we also made the **admin panel (React Js)** admin can list or manage products. we use **Node Js and MongoDB** for backend
